

World's Best Softwares

We are equipped with world's best softwares for pre-press from ESKO (World's Best graphic arts company producing prepress software and hardware for the packaging and labels, sign and display, commercial printing and publishing industries).

These softwares help in high-end colour correction, Image editing, image trapping and colour management.

We have installed India's first **PIXEL+** software.

What is PIXEL+?

-Pixel+ is a screening technology that provides screens and microcells specifically for Flat Top Plate Technology, which helps in printing even smallest microns present in the job.

For operating these high-end softwares we have best pre-press team with pre-press and printing experience of 20 years and more in fields like offset, flexography, gravure, packaging.

ALPHA FLEX

Premier Pre-Press Trade Shop

Digital Plates for Letterpress & Flexo Packaging Printing

ALPHA FLEX

The 4000 square feet premier pre-press trade shop in Delhi.

Three well-known companies joined hands to form ALPHA FLEX.

Our Infrastructure

ALPHA FLEX is a complete digitalized photopolymer plates manufacturing Plant. It is India's first company to install fully automated photopolymer plate manufacturing plant in first go. The idea behind ALPHA FLEX is to provide best quality pre-press services and photopolymer plates to label and flexible packaging industry.

With a thought in mind about the safer working environment for our workers and to preserve the nature, we have adopted eco-friendly plate processing solvent(CYLOSOL), which not only helps in good quality plate processing but also reduces carbon footprints.

We are armed with the state of art technologies and softwares from ESKO and DUPONT. We are not only equipped with world-class technologies but also have the best working environment in the industry.
